Play by Color

Color-Coded Song Sheets

What is Play by Color?

Play by Color is an exciting music activity created to help build musical confidence in young students while strengthening color identification and early reading skills. With Play by Color, students explore musical instruments and play their favorite songs, even if they've never played before!

This simple system acts as a foundation for reading notes on a staff and helps prepare students for future music

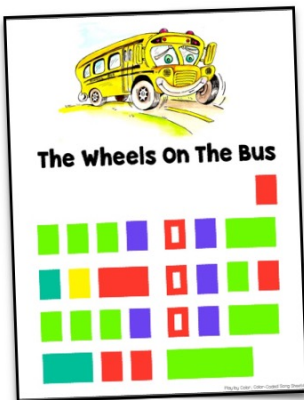

lessons.

Children as young as four years old can successfully read the song sheets!

Play by Color is compatible with any piano or keyboard, as well as Boomwhackers™ 8-note major diatonic pipes, handbells, and resonator bells.

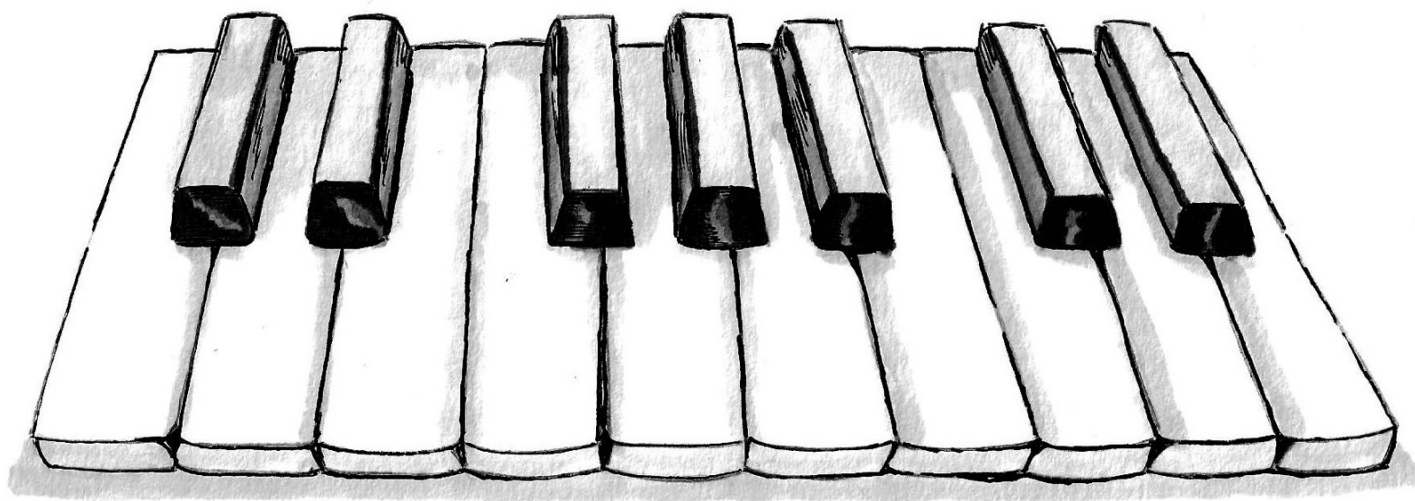

Use Play by Color Song Sheets:

- To teach children early music reading and piano skills.
- Help build confidence during music therapy.
- Encourage your child to play songs on any piano or keyboard you already own.
- Create an independent piano or keyboard center. Great for lower & middle elementary!
- Play songs together as a class or in small groups on Boomwhackers™.
- As an exciting introduction to reading music, and an activity that can be used prior to music lessons!

Playing music has never been so easy and fun!
